

Asset Valuation

What's the Fryingpan-Arkansas Project worth?

It's not a philosophical question, but a bricks-and-mortar look at the physical assets of the Project.

The Southeastern Colorado Water Conservancy District is undertaking an Asset Valuation to gain a clear understanding of the value of Project assets. While those assets are owned by the U.S. Bureau of Reclamation, the District pays more than half of the operations, maintenance, and replacement for project structures.

That includes five reservoirs, and almost 90 miles of tunnels all approaching 50 years of age.

The follow-up to the Asset Valuation study will be a Condition Assessment. This will give the District a better idea of how quickly reserve funds might be needed should the need for repairs arise.
